

Chat Box notes

Faerthen Felix:Hi everyone!

Faerthen Felix:Jeff is delayed for a few minutes...

celeste:Is my screen frozen or are we still on MFA project categories slide?

kevin Browne - UCNRS:is it just me or is the slide she is referring to not showing up

Becca Fenwick, UCNRS:me too

Rick Williams - RMBL:Are the powerpoint slides advancing?

celeste:Not here

Gil

Nelson:<https://drive.google.com/folderview?id=0B9zqKK80tdzhV0pzb1h2elBZSmM&usp=sharing>

celeste:Gil - link is to Rolands ppt from last time

Katja Seltmann 2:unshare and share again

Katja Seltmann 2:?

Becca Fenwick, UCNRS:gil can you put the ppt in the folder with Rolands ppt?

celeste:Becca's solution should work

celeste:connie - put your ppt into the folder with Roland's- Gil should be able to do so

kevin Browne - UCNRS:Idea - have Gill share his screen if he has PPT on his computer.

kevin Browne - UCNRS:it is for me

Becca Fenwick, UCNRS:yes it is advancing for me

kevin Browne - UCNRS:I got it

Rick Williams - RMBL:things are advancing fine for the participants

kevin Browne - UCNRS:Looks good

celeste:Seeing Recently funded project list

kevin Browne - UCNRS:Yes

Erica Krimmel, Chicago Acad. Sci.:Looks better now!

Faerthen Felix:I can see!

Gil Nelson:I will put the presentation into our folder once I convert it to pdf.

celeste:Gil, your mike is soft

Erica Krimmel, Chicago Acad. Sci.:Can you hear me?

celeste:No

Faerthen Felix:I saw some numbers, but what is the rate of successful proposals?

Gil Nelson:No, Erica

Faerthen Felix:Erica's mic is not working.

Becca Fenwick, UCNRS:How would a field station fit into the definition of a museum

kevin Browne - UCNRS:How are the restrictions of allowed and unallowed costs differ from IdigBio's proposals.

celeste:Do I understand collaboration is not an option for IMLS/MFA but only individual institutions?

Becca Fenwick, UCNRS:yes

kevin Browne - UCNRS:YES sorry

Faerthen Felix:Can these grants be renewed for multiple years?

kevin Browne - UCNRS:Right

Becca Fenwick, UCNRS:Are there restrictions on what can be used for the 1:1 match requirement?

kevin Browne - UCNRS:New display cases

Faerthen Felix:Many of us have similar needs. Are these applications more likely to be funded if we collaborate, rather than apply individually?

kevin Browne - UCNRS:Travel costs?
kevin Browne - UCNRS:as they go from station to station with thier
equipment for digitization
kevin Browne - UCNRS:Teching collections - Also reason I think we need
dispaly cabinets
kevin Browne - UCNRS:Need a place in field station for these cabinets
Faerthen Felix:Rick, we use our teaching collections for anyone who is
interested, which means everything from toddlers to post-docs. I assume most
stations are the same?
Erica Krimmel, Chicago Acad. Sci.:If collaboratively applying to the grant
is not an option, how could we effectively apply for a grant that would
create a shared resource (e.g. a traveling digitization station)?
celeste:DIId Gil's mic cut out or problem only here?
Erica Krimmel, Chicago Acad. Sci.:I can hear Gil fine
celeste:No audio, no chat added after Erica's response so signing out.
Bye, y'all!
kevin Browne - UCNRS:At NRS we do keep these logs
Faerthen Felix:Kevin & Becca, is collections log functionality already in
RAMS? If not, get a grant to add it
Erica Krimmel, Chicago Acad. Sci.:That makes sense, thank you!
kevin Browne - UCNRS:Rams is a log of the facility use (public and
researcher) - We could add museum specimen as a facility use entry to collect
this directly
Faerthen Felix:This seems like a good fit for us, thanks Connie!
Rick Williams - RMBL:How many field stations have a public "visitor center"
that could display collection objects?
kevin Browne - UCNRS:Good question to ask in our survey
Faerthen Felix:We don't have open public visitation, but we allow anyone to
visit if they are focused on research or education. Basically, we're a public
facility by appointment only.
Becca Fenwick, UCNRS:Some reserves in the UC system are open to the public,
but it varies.
Faerthen Felix:That makes sense!
kevin Browne - UCNRS:With the caviot of could they create one if had the
cabinets.
Becca Fenwick, UCNRS:Certainly!
Erica Krimmel, Chicago Acad. Sci.:Thank you Connie, that was really
enlightening
Becca Fenwick, UCNRS:Thanks Connie!
Erica Krimmel, Chicago Acad. Sci.:Definitely more approachable
Neil Cobb:Thanks Connie!
tom Arsuffi:Thanks all!!
Rick Williams - RMBL:Thanks Connie! and everyone else, too!
Faerthen Felix:Thanks!
Becca Fenwick, UCNRS:Thanks Gil!
Erica Krimmel, Chicago Acad. Sci.:Thank you, Gil
