Draft agenda for

Requirements for Biodiversity Information Aggregators

March 24-25, 2014

Primary Goal: Draft a requirements document for aggregators that describes information and services that are crucial to the success of biodiversity informatics.

Topics to be discussed include: Information security and semantics, feedback and annotations, attribution, transformations and normal forms, minimal taxonomic names services, minimal identifier resolution services

Writing (executive) group will meet separately to prepare a detailed agenda, establish goals, and write the report.

Monday, March 24

9:00-10:30   Writing group meets to discuss goals and strategies and to make a detailed plan for the plenary sessions

10:30-12:30   Plenary session to discuss issues from information providers

12:30-1:30   Lunch

1:30-3:00   Plenary session to discuss issues from information users

3:00-5:00   Writing group meets to discuss requirements

Tuesday, March 25

1:30-5:00   Writing group meets to write the report.
